

# Drive Efficiency and Innovation via Our Managed Gateway

Access One of the Largest Independent Medical Networks, Trusted Exclusively by 500+ Payers

## A Single Point of Contact Drives Time and Cost Savings

If you're like many payers, you may be juggling multiple EDI vendor relationships, assuming that this helps you obtain the best pricing by transaction type, and that it enhances security via having "back up" vendors if the need arises.

But as the exclusive clearinghouse for more than 500+ payers, we're confident we can help you achieve unparalleled time and cost efficiencies as we deliver best-in-class security. Moreover, when we manage all your EDI transactions, you can easily integrate and leverage our innovations—such as electronic attachments and clinical data retrieval capabilities—to improve your operations, end-to-end.

## How You Benefit

Our scalable and cost-efficient Medical Network, depth of expertise, and ongoing investment in innovation enable you to continuously optimize all facets of your business.

Consolidating all your transactions with us lets you:

- **Simplify your IT environment via a single connection**, which helps streamline operations and reduce administrative costs and security risk. You'll only have one vendor with whom to coordinate compliance and regulatory changes, conduct testing, and monitor transactions and security.
- **Gain visibility and insight into all your EDI transactions via a single portal**. You also have a single point of contact to request analytics and reports, and to research any transactional issues.
- **Potentially replace your risk-identity software with our hosted solution**, further driving savings.
- **Consolidate and standardize edits and routing** so all claims flow into your environment in a consistent manner, helping to reduce cost and complexity.

## One Network, Multiple Benefits

Our scalable platform offers one of the largest financial and administrative networks in the industry, connecting you to:

- 1 million physicians
- 125,000 dentists
- 39,000 pharmacies
- 6,000 hospitals
- 3,300 imaging facilities
- 700 laboratories

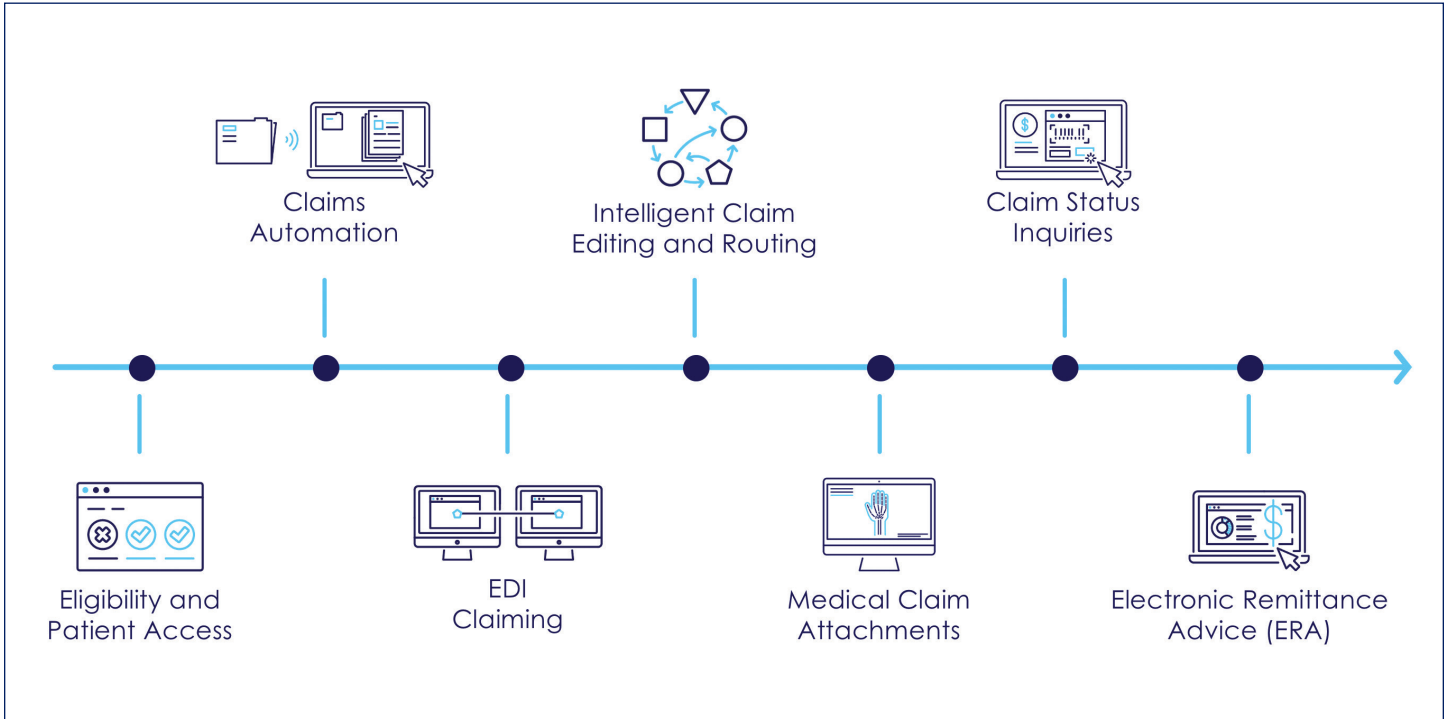

Once on our network, you can unlock opportunities with innovative solutions to optimize efficiency at every step. This includes:

- Applying advanced edits consistently to streamline all incoming claims
- Accepting solicited/unsolicited attachments and tapping into our electronic attachments solutions
- Helping ensure accurate payments by validating risk-adjustment data
- Managing eligibility, payments, and ERA digitally
- Improving the member experience via advanced interoperability and consumer-engagement solutions
- Accessing patient clinical data via EHRs, nationwide (vs. manual chart retrieval)

The breadth and depth of our Medical Network and our neutral position in the middle of the healthcare ecosystem enables us to deliver significant administrative optimization, innovative end-to-end workflow and distribution solutions, cost savings, and enhanced care to members.

**We Simplify EDI Processing at Every Stage of the Claim Continuum:**

We also add value with innovative capabilities that leverage machine learning and artificial intelligence to streamline and accelerate both the claims process and consumer engagement for greater provider and member satisfaction.

To give you utmost confidence in our security standards, we maintain industry-recognized accreditations and certifications, including CAQH CORE® Phase I, II, and III; HITRUST CSF®; EHNAC HNAP-EHN; EHNAC DTAAP-HISP Privacy & Security; MHCC certified EHN; and NCQA.

**Our team of experts are experienced and adept at helping health plans transition and consolidate their EDI transactions. Learn more about the time-and-cost efficiencies we can offer as your exclusive clearinghouse by contacting us at 1-844-217-1199.**
